

Agriculture

Award Type: Associate in Science

Allan Hancock College's Agriculture Program is designed for students preparing for, or advancing in careers in agriculture. The agriculture program will prepare students for a wide variety of entry-level positions related to agribusiness and agricultural science with an emphasis on local career opportunities such as pest management and control, agronomy, environmental horticulture, soil science, orchard/vineyard management, sales and marketing, agriculture technology, farm management, greenhouse and nursery operations, agricultural inspection, plant and animal nutrition, and crop advising. Students will gain practical skills in effective communication, problem solving, critical thinking, collaboration, and leadership through hands-on learning and field trips to local agricultural operations. This program will also prepare students for transfer into certain university Agricultural Science programs. See a counselor for specific university requirements.

The graduate of the Associate in Science in Agriculture will:

- apply current agricultural industry standards, laws and regulations in the agricultural sciences or related fields.
- assess and differentiate effects of agricultural activities in plant and cropping systems, while describing alternative practices in order to make sound agricultural decisions that ensure the quality and success of a crop.
- employ effective business skills using industry analysis, market trends, business plans and other standard agribusiness techniques, when presented with a farm or ranch management situation.
- demonstrate knowledge of soils, fertilizers, plant nutrition, and current industry growing techniques and apply this understanding to successfully produce agricultural crops.
- demonstrate basic worker safety practices.
- identify common insect and disease pests and use knowledge of pest life cycles to recommend pest prevention and management plans.
- demonstrate an understanding of crop plant biological functions and their application to successful commodity production.

Program Requirements

A major of 24 units is required for the associate in science degree.

Required core courses 15 units

Course Number	Course Title	Units
AG 125	Introduction to Soil Science	4.0
AG 130	Integrated Pest Management	4.0
AG 150	Introduction to Agribusiness	3.0
AG 161	Introduction to Plant Science	4.0

Plus a minimum of 9 units selected from the following:

Course Number	Course Title	Units
AG 149	Cooperative Work Experience: Occupation	1.0 - 8.0 units
AG 152	Introduction to Animal Science	3.0
AG 153	Introduction to Sustainable Agriculture	3.0
AG 154	Introduction to Fruit Science	3.0
AG 155	Introduction to Mechanized Agriculture	3.0
AG 157	Agricultural Sales, Communication & Leadership	3.0
AG 156	Intro to Environmental Horticulture	3.0
AG 160	Plant Propagation and Production	3.0
AG 162	Agricultural Plant Pathology	4.0
AG 163	Economic Entomology	4.0
AG 164	Weed Science	4.0
AG 165	Qualified Applicator Training	2.0

AG 126	Fertilizers & Plant Nutrition	4.0
VT 102	Introduction to Animal Feeding and Nutrition	3.0
