

## CalWORKs Services

The Allan Hancock College CalWORKs Program offers supportive services to students currently receiving cash assistance through their county's CalWORKs program. These supportive services are designed to assist students to obtain the educational training and skills they need to transition off of cash assistance and ultimately achieve self-sufficiency.

Available services include: new student orientation; intake and service coordination; career assessment and education planning; classes and programs (including GED and degree programs) to develop or enhance job/educational skills; referrals for on campus childcare and work-study opportunities; study labs and tutoring; school supplies; transportation, food vouchers and educational grants (when available).

For further information, please contact the CalWORKs program at 805-922-6966 ext. 3214, or visit the CalWORKs program in building A, Room 201 on the Santa Maria campus.
